HARSTAD

- culture, history and coastal adventures!

Harstad is situated on the largest island in Norway, Hinnøya, and is surrounded by the most beautiful coastal landscape with skerries and small islands. The municipality has 23 803 inhabitants and is known as the culture capital of northern Norway. Shipping and industrial activities are important for the regional economy, and the municipality is also the base of the petroleum industry in the north. Harstad is the communication center of a densely populated region; with Lofoten to the west, Tromsø to the north, Narvik to the east and Bodø to the south. Harstad is renowned for its rich cultural life and its high quality restaurants. When the annual Cultural Festival of Northern Norway is arranged in the last week of June, the streets teem with people and there is music in clubs, churches and the Concert Hall. The summertime in Harstad has its own unique atmosphere; a quiet little town in northern Norway brought to life - with people, culture and adventures close to Nature.

ATTRACTIONS/ EXCURSIONS

We provide a wide variety of tailor made excursions and activities for visitors to Harstad. Our guides are highly competent and will do their very best to make your excursion an unforgettable experience. From the ship the city center is easily accessible, also for those with reduced mobility.

The Trondenes Peninsula

Duration: 3.5 Hours. Capacity: 10-300 pax
The Trondenes Peninsula is historically important; in the Middle Ages it was once the seat of one of Norway's most powerful Viking Clans. Visit the world's northernmost stone church, the Trondenes Church, dating back to the late Middle Ages (1250). A short walk from the church you will find Trondenes Historical Center, with an exhibition which takes us from the Viking ages to the present day. Further up the hill lies the Adolf Gun, a remnant

from the German occupation during WW II. This is one of the world's largest land based cannons and the world's only fully restored fortification of its kind. It has a barrel measuring 40.6 centim in diameter and could hit targets 50 km away.

Anna Rogde

Duration: 4 Hours. Capacity: 20-60 pax
Anna Rogde is the world's oldest sailing Schooner (1868) and one of Harstad's major attractions. Set sail and experience the Vågsfjord, a Northern Lights safari or a whale safari on board this beautiful ship.

The green community - Kvæfjord

Duration: 5 Hours. Capacity: 10-120 pax
In the lush countryside of Kvæfjord you will find the Rå Gardening School, with plants specially adapted to the Arctic climate. You can visit Hemmestad Brygge (wharf), which is a former trading post where time has stood still for almost 200 years. In Kvæfjord you

will also find the Trastad Collection, where you can visit an authentic residential and care facility from 1966. Today the institution is a museum; see a unique collection of art in the only gallery in Norway exhibiting art created by people with mental disabilities. We recommend lunch at the beautiful Røkenes Gård, dating back to 1750, before returning to your ship.

Valhall

Experience the beautiful area of skerries and islands just outside Harstad and Hinnøya. At Valhall you can enjoy the magnificent sight of the Midnight Sun in the summer and the Northern Lights in winter. Meet the local wildlife up close; eagles, whales and orcas. Valhall offers accommodation, food and beverages as well as guided trips in a RIB, a fishing boat or maybe you would like to see Meløyvær Fort - a coastal fortress and relic from the Cold War, built in 1988.

Olaåsen Farm. Photo: Terje Marthinsen

Olaåsen Farm

Duration: 4 Hours. Capacity: 4-30 pax
Olaåsen Farm is a farm located in a natural and beautiful environment. Enjoy a light meal cooked in a lavvo (a traditional Sami tent) and experience the rural and authentic atmosphere, while being entertained by traditional Sami drums and joik. The area around the farm is perfect for taking photos of the landscape and, in the winter, the Northern Lights.

Vilgesvårre

Duration: 3-5 Hours. Capacity: 5-21 pax
Experience a magical journey in Sami culture, history and traditions. Vilgesvårre was an original Sami settlement in Skånland, abandoned in 1958. Today it is restored and you can experience a unique adventure in Sami culture and traditions. Enjoy authentic Sami dishes, try lassoing reindeers and visit a real Sami sacrificial site.

Polar Zoo

Duration: 6 Hours. Capacity: 15-110 pax
Visit the world's northernmost zoo with a rich display of local Arctic wildlife. The biggest tourist attraction at the Polar Zoo is the Wolf Camp, where you can

Gangsås. Photo: Ninna Myrvang

meet the wolves inside the enclosure. It is also possible for families with children to meet polar foxes inside the enclosure; an unforgettable experience.

Hiking to Keipen (Aune) - a breathtaking view

Duration: 3.5 Hours. Capacity: 10-180 pax
Enjoy the magnificent view from the top of Mt. Aune (490 m above sea level). The guide will make an open fire, serve real Norwegian "fire coffee" and offer something to eat. This is an easy walk and is therefore suitable for all ages. Remember to bring your camera; from the top plateau the mountain descends steeply into the ocean.

Fishing trips in Vågsfjord

Duration: 3-4 Hours. Capacity: 5-86 pax
A wonderful opportunity to go deep sea fishing with a local skipper who has expert knowledge of the fishing grounds in the fjords outside Harstad. While fishing, enjoy the beautiful setting of the many skerries and small islands that surround you.

The Northern Lights

The Northern Lights only occur in the northern hemisphere and are also known as the Aurora

Harstad in moonlight. Photo: Gøran Heide

Borealis, a phenomenon of nature where particles from the sun reaches the earth's hemisphere. The Northern Lights are normally visible in the Harstad region from September to April, and to see them one is dependent on dark and clear skies. A tip would be to travel outside the city lights, where you will get an even more spectacular view.

The Midnight Sun

Experience the magnificent Midnight Sun at Nupen; the most romantic place in Norway. The Midnight Sun is a phenomenon where the sun does not go below the horizon anytime during the day. The Midnight Sun is normally visible in Harstad from mid May to mid July when there is near daylight 24 hours a day.

Snow Fun

Duration: 4 Hours. Capacity: 10-40 pax
Go to the top of Mt. Sollia by snow scooter, then sled down the side of the mountain. During the visit you will also play a game of curling with natural stones and take part in a toboggan race. A hot lunch is prepared over the fire in a lavvo (traditional Sami tent).

PORT OF HARSTAD

Distance to nearest pilot station nautical miles/Hours: 40 nm/3hour Lødingen pilot station
